PREFACE

IN presenting this issue of the Cleveland Blue Book, Social Register and Elite Directory, the author and publisher is convinced that the work will prove more complete and useful to its subscribers than any previous issue.

The features that have heretofore made the book valuable have been retained and several additions have been made.

In addition to the names and addresses of prominent families, the names of the clubs to which each man of the family belongs, the Alma Mater of each college graduate, and the names of the junior members of the family between twelve and twenty years of age, the book contains both the old and the new house numbers and street names. All of this information is given in connection with the alphabetical list of names and street lists, giving the volume a new value from the standpoint of ready reference.

The author and publisher tenders her thanks to those who have made the present work possible by their subscriptions and assistance, and expresses the hope that the work will fully meet all requirements.

HELEN DE KAY TOWNSEND.

Publisher.

THE

THE

THE

THE

EXPLANATORY

In the following Alphabetical List, the name in smaller type immediately below the names of a man and wife or a widow denotes the woman's maiden name. The letters and figures following these names denote the clubs, college degrees and year of graduation of the husband. The same principle is followed with regard to other names in the family. The prefix Junior signifies children between the ages of twelve and eighteen for girls and fourteen and twenty for boys.

Both the old and new addresses will be found in the alphabetical list. In the Street List the first number is the new, while the one following is the old. With these addresses it will not be necessary to refer to a street guide to learn to what name or number a street has been changed. The publisher believes that this new feature alone will prove of great value. Due to the complete renumbering of a number of streets on different occasions the publication of this book has been delayed from time to time.

Wedding Invitations

Nothing evidences refinement more than a correct wedding invitation. The careful consideration and expert knowledge given by our Society Stationery Department to the minute details of wedding engraving done by us give to it a distinguished and exclusive air that is most desirable. In materials we use only the choicest that can be procured. The workmanship bestowed upon most carefully selected stock is all done by skilled artisans—men who have been doing the same thing over and over again for many years. No better work can be turned out than we give you.

Not only are we in a position to execute your commission in the most approved manner, but further, a message by telephone will promptly bring to your residence one of our employes with samples and prices ready to answer your various questions, and you may ask for this with the definite assurance that no obligation to employ our equipment, excellent though we think it to be, is thus created. Please give us a trial

Dickerman, Mr. & Mrs. John—Uv.Ad.'91 Josephine A. Sherwood	1957 Doan St. 2059 E. 105th St.

1. The first part of the paper is devoted to a general discussion of the problem of the origin of life. It is shown that the problem is one of the most important and most difficult in the history of science.

2. The second part of the paper is devoted to a detailed discussion of the various theories of the origin of life. It is shown that the most plausible theory is the one which assumes that life originated from non-living matter.

3. The third part of the paper is devoted to a discussion of the evidence in favor of the theory of the origin of life from non-living matter. It is shown that the evidence is very strong and that the theory is well supported by the facts.

4. The fourth part of the paper is devoted to a discussion of the various objections to the theory of the origin of life from non-living matter. It is shown that the objections are not well founded and that the theory is still the most plausible one.

5. The fifth part of the paper is devoted to a discussion of the various applications of the theory of the origin of life from non-living matter. It is shown that the theory has many important applications in the fields of biology, chemistry, and physics.

WARREN S. HAYDEN

OTTO MILLER

Member Cleveland Stock Exchange

Hayden, Miller & Company

AS DEALERS in investment securities, buy and sell for their own account municipal bonds and such bonds of private corporations as are of non-speculative character and suited to the requirements of insurance companies, banks, trustees and conservative investors generally.

As brokers they buy and sell for the account of others securities listed on the Cleveland Stock Exchange and such other securities as have a Cleveland market.

Helene De Kay Townsend
Publisher

I will take complete charge of the Engraving, Printing, Addressing and Mailing of Invitations and Announcements for all Social Functions, and will also arrange, revise and index Visiting Lists.

My personal supervision will be given all such work, insuring accuracy and satisfaction.

Lists for Social and Business purposes furnished on short notice.

Helene de Kay Townsend.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) and (2) under the assumption that the functions $f_i(x)$ and $g_j(x)$ are continuous and satisfy certain conditions. It is shown that under these conditions the system has a solution in the class of continuous functions.

2. In the second part of the paper, the problem of the uniqueness of the solution is considered. It is shown that if the functions $f_i(x)$ and $g_j(x)$ satisfy certain conditions, then the solution of the system is unique.

3. In the third part of the paper, the problem of the stability of the solution is considered. It is shown that if the functions $f_i(x)$ and $g_j(x)$ satisfy certain conditions, then the solution of the system is stable.

4. In the fourth part of the paper, the problem of the dependence of the solution on the initial conditions is considered. It is shown that if the functions $f_i(x)$ and $g_j(x)$ satisfy certain conditions, then the solution of the system depends continuously on the initial conditions.

5. In the fifth part of the paper, the problem of the dependence of the solution on the parameters of the system is considered. It is shown that if the functions $f_i(x)$ and $g_j(x)$ satisfy certain conditions, then the solution of the system depends continuously on the parameters.

STREET LIST

In arranging this Street List the publisher found it more satisfactory to use both the old and new numbers. The first figure in a line is the new number, while the second is the old number. The name underneath a street designates the new name.

ABINGTON ROAD, S. E.

2045—	Carlisle, Mr. & Mrs. Robert	2056—	Woods, Mr. & Mrs. James H.

THE TEST

When a person is asked to perform a task, he is usually asked to perform it as quickly as possible. This is the case with the test of the speed of the hand. The test is performed by having the subject move his hand from a starting point to a target point as quickly as possible. The time taken for the hand to move from the starting point to the target point is the time taken for the hand to move from the starting point to the target point.

The test is performed by having the subject move his hand from a starting point to a target point as quickly as possible. The time taken for the hand to move from the starting point to the target point is the time taken for the hand to move from the starting point to the target point.

Advantages of Electric Light

Are becoming to be widely recognized. Electricity is indispensable in every well equipped household. Cooking utensils—luminous radiators—coffee percolators, and many other devices may be operated with electrical current at very moderate cost. For illumination, electric light is cleaner—safer—wholesomer—than any other. Wire your house now. The cost is moderate.

Call Bell Main 2401 or Cuyahoga Central 5860 for information desired.

THE HISTORY OF THE
CITY OF BOSTON

The first settlement in Boston was made in 1630 by a group of Puritan settlers from England. They came to the city in search of religious freedom and a place to practice their faith. The settlers were led by John Winthrop, who was elected the first mayor of the city. He gave a famous speech to the settlers, in which he said that they were going to create a "city upon a hill" that would be a model for the rest of the world. The city was founded on a small island in the harbor, and the settlers built a fort to protect themselves from the Native Americans. The city grew rapidly, and by 1639, it had a population of over 1,000 people. The settlers built a church, a school, and a government. They also established a system of laws that was based on the principles of the Bible. The city was a success, and it became a model for other Puritan settlements. In 1639, the city was incorporated as a town, and in 1689, it became a city. The city has since grown into one of the largest and most important cities in the United States. It is a city of many firsts, and it has played a major role in the history of the country. The city is a place of many legends, and it is a city that has inspired many people. The city is a place of many firsts, and it has played a major role in the history of the country. The city is a place of many legends, and it is a city that has inspired many people.

THE HISTORY OF THE
CITY OF BOSTON

The city of Boston, situated on a peninsula in the State of Massachusetts, was first settled in 1630 by a group of Puritan settlers. The city grew rapidly and became one of the most important centers of commerce and industry in the New England region. In 1773, the city was the site of the Boston Tea Party, a significant event in the American Revolution. The city was then the center of the American Revolution, and it was here that the Declaration of Independence was signed. The city was the site of the Battle of Boston in 1775, and it was here that the British evacuated the city and sailed to Halifax, Nova Scotia. The city was then the center of the American Revolution, and it was here that the Declaration of Independence was signed. The city was the site of the Battle of Boston in 1775, and it was here that the British evacuated the city and sailed to Halifax, Nova Scotia.

The city of Boston has a rich history and has been the site of many important events in American history. The city was the site of the Boston Tea Party, the American Revolution, and the signing of the Declaration of Independence. The city was the site of the Battle of Boston in 1775, and it was here that the British evacuated the city and sailed to Halifax, Nova Scotia. The city was then the center of the American Revolution, and it was here that the Declaration of Independence was signed. The city was the site of the Battle of Boston in 1775, and it was here that the British evacuated the city and sailed to Halifax, Nova Scotia.

Albert & Bohman

1000 Broadway, New York City

Dear Sirs:

We have the pleasure to inform you that your order for 1000 copies of the "New York City Directory" has been received and is being processed. The books will be ready for shipment within the next few days.

We are sorry that we cannot deliver them to you immediately, but the printing process has been delayed due to a shortage of paper. We will notify you again as soon as the books are ready for shipment.

Very respectfully,
Albert & Bohman

Yours truly,
Albert & Bohman

GUARANTEED TAILORING

EVERY garment we make, whether ordered in person or by mail, is guaranteed, and may be returned if any part goes wrong and the fault is ours, that we may make it right.

We measure, cut, fit, make and finish with exceptional care; we know our cloths, linings and trimmings; we guarantee our workmanship and values, and we protect our guarantee.

A man may do any one of a hundred things that would ruin a garment—please do not blame us for that—but for any fault of our own we cheerfully make good. We have expert cutters and clever designers—fit every man's form perfectly and his taste successfully—not one garment in a hundred comes back for cause.

That possible hundredth garment means progress.

Suits and Overcoats made to order—\$15, \$17.50, \$20, \$22.50, \$25.
Evening Dress—\$25, \$30, \$35.

Refinement

THE refinement of printing—for society and commerce alike—is reflected in the product of THE BRITTON PRINTING CO. The artistic touch is dominant in the harmony of effect produced. Correctness in style on all engraved and printed work is manifest. Each order (whether an engraved announcement or a massive catalog) receives the same intelligent treatment. Our many portfolios of samples will help you make satisfactory selection.
